AHT-LPS Training Program

AHT-LPS stands for Anti-Human Trafficking - Low Profile Security.

MDTA Specialist Training Only - Anti-Human Trafficking
This training is for professional bodyguards who are looking at working one-up in Anti-Human Trafficking environments. Where you need to escort a client into, or out of, high risk zones under LPS conditions.

MDTA Training is utilized by many Government and Non-Government AHT organisations .
It is NOT an RTO course or licensing course. It is realistic professional training for serious professionals in the AHT field.

AHT - LPS
Within AHT- LPS, there is a wide range of specialist skills. In fact, the skill sets vary from working with children being securely escorted, to working with other AHT professionals escorting them for various reasons. Each job or task requires a different mind and selection of skills and can involve different qualifications.

AHT – LPS Training
If not already qualified and trained, you will have to attend a number of training courses before you will be deemed as effective in an AHT role. MDTA training offers training to refine your skills in multiple ways. From LPS attire to protocol and etiquette dealing with different cultures.

Depending on your role there will be a requirement to undertake security and risk assessment SOP training, firearms training, unarmed combat, first aid and defensive driving as well other specific skills depending on the field you work in.

AHT-LPS - Is a very high risk profession and requires training to understand these high risk situations and environments. And to know how to complete a thorough risk assessment and to implement mission and operational procedures to minimise risk for your primary asset.
